

ABSTRACT

In a gaming machine such as a bingo game, there is provided such a gaming machine that game players are effected with realistic sensations and spectators other than game players are involved. The gaming machine is
5 equipped with lottery ball throwing means for throwing a plurality of balls onto a face portion of a cabinet, ball entrance detecting means for detecting whether all the plurality of lottery balls thrown onto the face portion of the cabinet by the lottery ball throwing means enter a plurality of lottery holes, and lottery ball
10 discharging means for discharging the plurality of lottery balls entering any one of the plurality of lottery holes. When it is detected by the ball entrance detecting means that all the plurality of lottery balls thrown by the lottery ball throwing means enter any one of the plurality of lottery holes, the lottery ball discharging means functions to discharge all the plurality of lottery balls after a predetermined time elapses.
